

Pipe Sizing Chart for Natural Gas

This chart below is based on gas pressure in the range 0-0.5 psi, specific gravity of 0.6, and pressure loss of 0.5"WC. Numbers are for straight 40 pipe; fittings further reduce capacity. For example, in 1" size, an elbow is equivalent to about 2.6 feet of pipe, a tee is equivalent to about 5.2 feet of pipe

**Maximum capacity of pipe in cubic feet/hr of natural gas
(Multiply values by 1000 to get nominal BTU/hr capacity)**
